Check a Card
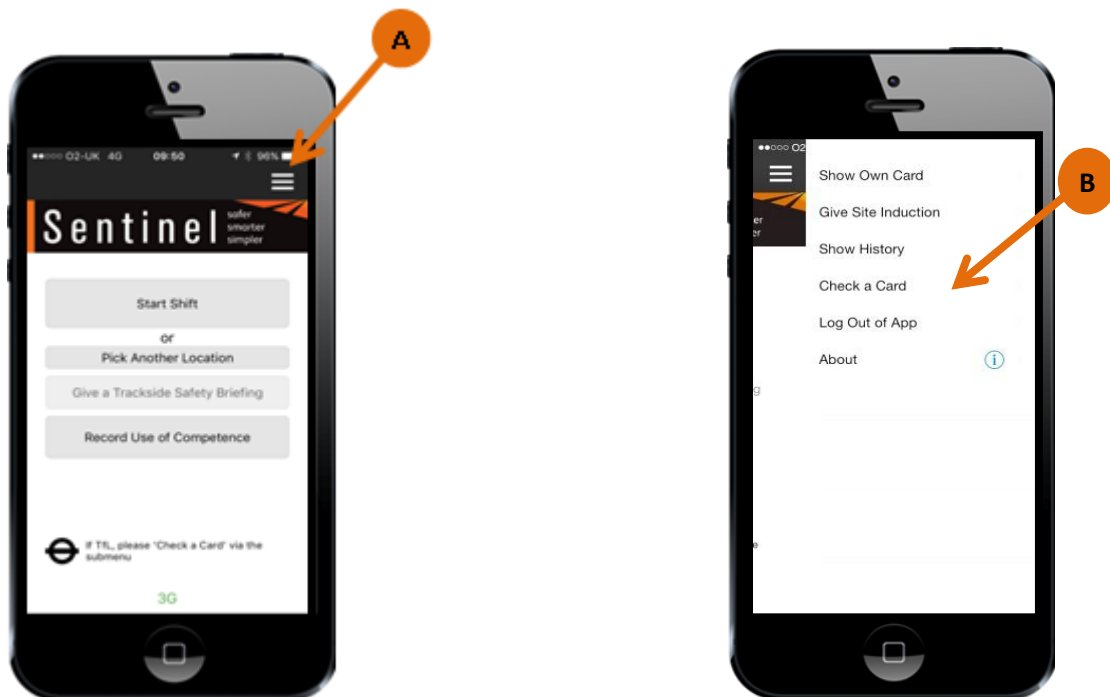

If Sentinel app users do not want to fully use the new functionality which launched on Tuesday 04 October, or are unable to use the new functionality then they can continue to Check a Card. This provides users with the same information that they would have seen on the previous app, for example competency, sponsor, and medical information.

An iPhone example is shown below, however **all** mobile devices and operating systems (iOS, Android and Windows) feature a sub-menu from the front page (see A below) with the option to Check a Card (see B below).

If you have any questions please call the 24/7 Sentinel Helpdesk: 0330 726 2222
